FACILITATE YOUR X-RAY INSPECTIONS

Sherlock Security is a software solution that has been designed and developed by Teledyne ICM for EOD specialists.

It is the perfect tool for on-the-field security inspections. The intuitive and user-friendly touchscreen software produces high-quality images and comes with many different enhancement features.

Sherlock Security is delivered with all our detectors as a standard package and works best combined with our CP Batteries and LITEX portable generators.

SOFTWARE FEATURES

All-in-one touchscreen software
Available in 20 languages

Detailed Image information tag

ROI enhancement

Side by side

Material discrimination (in option)

SAFETY WARNINGS. The Goods can cause death, personal injury or property damage if they are used, operated, maintained, stored or disposed of improperly. In particular, the Goods may emit x-ray radiation, so adequate safety precautions must be taken to minimize exposure. At a minimum, Buyer should adhere to the ALARA (as low as reasonably achievable) principle and should comply with all applicable regulations relating to protection against x-ray emissions.

All specifications are non contractual and subject to change without prior notice.
